// SKIS

Skis make all the difference in getting your sled to handle just how you like. We offer eight different styles of skis for you to choose from. Which one is right for you? Here are some tips on choosing the right one:

PLATFORMS: REV GEN4 / XP / XR / XU / XS / XM / REV

TOURING	 	**PILOT 5.7 SL** 2 carbides/ski	• Lightweight single or dual runner skis provide effortless steering at low speeds and constant grip without compromise at higher speeds. • Standard use is one carbide runner—add a second to reduce darting. • Great all-around trail performance.
UTILITY	 	**PILOT 7.4** 1 carbide/ski	• Specifically designed for utility purposes. • Deeper keels allow more control while towing. • Increased tip-up rear end for better reverse capability. • 1 inch wider than Pilot DS-2 for improved flotation in deep snow. • More aggressive cornering while keeping a light steering feeling.
TRAIL SPORT	 	**PILOT 5.7** 1 or 2 carbides/ski****	• Lightweight single or dual runner skis provide effortless steering at low speeds and constant grip without compromise at higher speeds. • Standard use is one carbide runner—add a second to reduce darting. • Great all-around trail performance.
	 	**PILOT TS ADJUSTABLE** 1 carbide/ski	• The industry's first and only adjustable ski. • The Pilot TS skis allow riders to change ski bite for changing snow conditions or riding styles easily and quickly. • With the Pilot TS skis you dial in the perfect setting by turning a knob on the ski leg. • The ski runner has ½" (12.5 mm) of travel up and down. • The thin runner and square keel design work together to eliminate darting.
	 	**PILOT X** 1 carbide/ski	• Completely redesigned from Pilot 5.7 with a new structural topside for 10% more rigidity. • 31 mm longer keel with a new shape reduces darting. • Adds 10% more lateral surface area and blends more smoothly with a new carbide. • 11° degree reduction in approach angle.
	 	**PILOT TX** 1 carbide/ski	• Improved to better match the REV Gen4 features. • Redesigned top side for increased rigidity. • 20 mm shorter overall length and more dramatic tip-up at the rear. • 63 mm longer runner plate increases lateral surface for more effective cornering. • Smoother front approach angle to reduce darting even further.
TRAIL PERFORMANCE	 	**PILOT R** 1 carbide/ski	• Straight from the MXZ X 600RS race sled. • Very aggressive profile for sharp handling. • Lightweight with high rigidity. • Proven on the ISOC race circuit.
DEEP SNOW	 	**PILOT DS**** 1 carbide/ski	• Designed specifically for deep snow riding. • Works well in many off-trail applications from utility sleds to mountain sleds. • Thin edge is effective for grabbing side hills.
	 	**PILOT DS-2** 1 carbide/ski	• Evolution of the DS with a deeper and shorter keel. • Increased agility and less effort than the original. • Great all-around ski for deep snow use. • Standard on mountain sleds with 2.5" lug tracks and utility sleds.
	 	**PILOT DS-3**** 1 carbide/ski **PILOT DS-3 REV Gen4***** 1 carbide/ski	• Deep snow ski designed to match the latest 3" lug and longer tracks. • 0.47" (12 mm) deeper keel than DS-2. • Works well for aggressive riders using the biggest tracks.

***Does not fit REV Gen4. ***Fits only REV Gen4. ****Second carbide can be added to ski by drilling marked additional holes.*
Note: The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of maneuverability, acceleration and braking. Please refer to your Operators Guide for more details.

SLIDER WITH VESPEL† INSERTS

All models with 163" and longer tunnels	**503194816**
All models with 154" and shorter tunnels	**503194815**

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired length.
- Better fuel efficiency, more power and increased vehicle speed due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.

**Protected under patent numbers US 7,413,198, US 7,389,995 and CA2535565. ‡While supplies last.*

DRILL BIT

To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers and on approved pre-patterned tracks only. These tracks come standard on most 2022 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of maneuverability, acceleration and braking. Please refer to your Operators Guide for more details.
