WE LIVE FOR THE WINTER

The days are shorter.
The lakes are frozen.
The wait is over.

Cold air fills the lungs.
Frost bites the skin.
All senses awaken.

Start of the engine.
Squeeze of the throttle.
Gateway to our realm.

Where titles don't matter.
A place free from chatter.
A true purpose to be found.

This is what we work for.

This is what we live for.

ROTAX® ENGINES

ROTAX 2-STROKE ENGINES

Heart-thumping power, lightweight design, proven reliability—E-TEC direct-injection engine technology delivers the most sought-after attributes in the snowmobile industry.

Our lineup of 2-stroke engines now includes the brand-new 600 EFI (Electronic Fuel Injection) engine. Reliable, affordable and easy to use, it's an entry-level engine that far exceeds what you thought an entry-level engine had to be.

With the E-TEC engine lineup you also get:

- Industry-leading fuel economy¹
- Excellent oil economy
- Virtually no smoke or smell
- Light, linear throttle pull
- Automatic summerization process

850 E-TEC TURBO R

- 180 hp up to 2,400 meters²
- World's first factory-built 2-stroke turbo

850 E-TEC

- 165 horsepower²
- Down to 12.3 L/100 km²

600R E-TEC

- 125 horsepower²
- Down to 11.3 L/100 km¹

E-TEC engines are the best-selling 2-stroke engines in snowmobiling.³

ROTAX ACE™ 4-STROKE ENGINES

With the Advanced Combustion Efficiency (ACE) family of engines, BRP engineers optimized the combustion system, reduced mechanical friction and freed intake and exhaust breathing. The result is the most efficient engines in snowmobiling. Not only are they efficient, they're a pleasure to operate and own. Very little maintenance is required; they run smoothly and produce a nice, solid—yet quiet—sound.

900 ACE TURBO R

- Rotax-designed turbocharger
- 180 horsepower²
- Cable-activated throttle with reconfigured iTC™

ACE engines are the best-selling 4-stroke engines in snowmobiling.³

INTELLIGENT THROTTLE CONTROL

Standard on the ACE engines, the iTC system delivers a whole different snowmobiling experience.

- **Driving modes:** A button on the console enables you to select one of three driving modes. Standard mode ensures a smooth start and linear acceleration; Sport enables full performance and quicker acceleration; ECO® limits top speed and acceleration rates for a more relaxed, fuel-conserving ride.
- **Finger throttle** (only on 600 ACE and 900 ACE engines without Turbo): The throttle block can be rotated forward for use as a finger throttle, if preferred. Great for changing hand positions on a long ride and for more control through bumps.

¹ Data based on internal engineering trail testing.

² Observed metric horsepower based on internal dyno test performed in optimal conditions.

³ Based on retail sale results as of December 31, 2019.

Experience the advantage of XPS. Oil and care products engineered to extend the life of your ride, tested in the world's harshest conditions and designed to optimize your vehicle's performance. Learn more at XPSlubricants.com

ADVEX HELMET

If versatility were a helmet, it would be the Advex. Built for the active rider, the helmet adapts to temperature changes better than the competition to perform at a high level in all conditions.

PERFORMANCE:

KEY BENEFITS:

KEY TECHNOLOGIES (ADVEX VS OXYGEN)

What differentiates the Advex Helmet from the Oxygen? For one, the Advex is designed for the more active rider. Thanks to the M-FORCE composite shell, it delivers the same incredible performance and protection. But where it shines is in versatility: with a superior humidity management system, the Advex excels in a variety of weather conditions. Plus, the Advex's Jet-Style design means easier face access, guarantees an improved noise reduction system and gives an edgy look.

HOW TO MEASURE

SIZING CHART

HEIGHT: without shoes, standing with heels and back against a wall.

HEAD: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

ARM LENGTH: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

CHEST: measure under your arm, around the fullest part of your chest.

WAIST: immediately below the lowest rib.

HIPS: across the fullest part of the seat.

INSEAM: without shoes, from crotch to the floor.

GLOVES: measure palm width.

BOOTS: foot length from heel to toe.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.
